# Medisoft Revenue Management

The newest name in claim management can help you get paid faster

It's Time to move to a better EDI Solution

medisoft

The screenshot displays the Medisoft Revenue Management software interface. The main window, titled "Revenue Management - DemoData - Claims", shows a table of claims with columns for Send, Claim #, Status, Chart, Status 2, Case, Edit Status, Batch 1, Ins 1, Rcvr 1, and Pri Billing Method. Below the table, there are buttons for Services, History, and Edits. A detailed view of a claim is shown, including a table of services with columns for Date From, Procedure, M1, M2, Units, Amount, D1, D2, D3, D4, Prov, PoS, I1, Amt, and Pd. The interface also includes a "Process Remittance" window showing a summary of remittance data and a "Remit Totals" window showing a summary of remittance totals.

- Creates professional and institutional claims to payors accepting HIPAA-compliant ANSI 837 formats.
- 835 ERA remittance auto-posting with the ability to edit ERA before posting
